

The TESAB Model TS1548 Tracked Mobile Screen

The TS1548 is a 3 way split machine and is designed mainly for primary screening to obtain high outputs of up to 800* TPH. This machine is the largest capacity tracked screen in the market. This is mainly due the operational layout of the machine which sets it apart from its competitors.

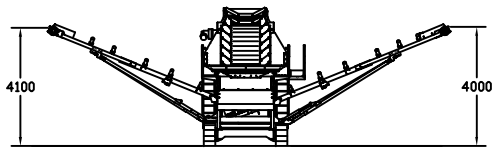

Features

- High capacity 3 product mobile screen up to 800TPH
- Variable stroke, 3 shaft horizontal screen
- Heavy duty "Hardox" lined apron feeder
- Fine tuned 16'x5' horizontal screen
- Robust chassis construction, designed specifically for heavy duty quarry applications
- Can be converted to 4 or 5 product machine
- Oval screening action minimises pegging, giving superior separation and loosens fines
- Easy maintenance with minimum use of hydraulic cylinders
- Onboard folding conveyors for fast set up and relocation onsite
- Large stockpiling capacity
- Reliable "CAT" power

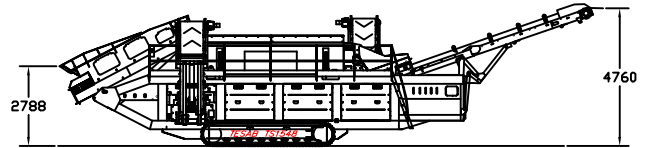

Specifications

Apron Feeder	Folding 1200mm wide
Side Conveyors	Folding 800mm wide
Transfer Conveyor	1350mm wide
Oversize Conveyor	Folding 1200mm wide
Screenbox	1.5m x 4.8m Horizontal
Powerunit	Diesel/Hydraulic -Caterpillar

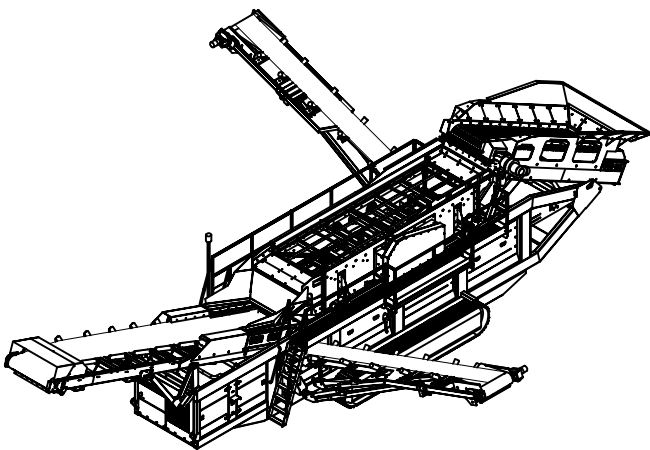

* Output varies depending on application and material type
